

SPECIAL EXPEDITION

MANTA RAYS

WHO IS IT FOR

Are you a passionate diver willing to learn more about Gentle giants?

You want to be one of the citizen scientists to record them in the wild? This cruise is for you!

Not only will you dive on some of the most beautiful dive sites in the Andaman Sea, but you will share this cruise with Thailand Manta Rays specialist: Jamie Piyada Monmaneerat

ITINERARY: MERGUI ARCHIPELAGO, MYAMMAR

This itinerary will focus on The Andaman Sea's best spots to see Oceanic Manta rays such as Black Rock in Mergui Archipelago. Depending on sightings the previous weeks, we will dive the south of Mergui Archipelago and may go to the Burma banks.

Not only will you have some fantastic dives but this cruise is also your chance to try Black Water diving!

We plan 4 dives per day (including 1 sunset or night dive), 4 meals and a presentation per day.

Jamie, our special guest on this trip is a Marine biologist and Manta ray's conservationist, she will be happy to answer all the questions you may have about Giant Manta's and the many other species she is passionate about...
